

## Ranges of Scenic Designers by Positions Per Season in Relation to Total Number of Scenic Designers and Scenic Design Positions

The following statistics are based on number of positions per designer over all seven seasons examined.

In scenic design, designers with an average of less than one position per season (less than 7 designs over the 7 seasons) were 72.1 percent of all scenic designers, and they held 23.1 percent of all scenic design positions. Scenic designers with an average of one to less than three positions per season (at least 7 but less than 21 designs over the 7 seasons) were 19.8 percent of all scenic designers, and they held 35.8 percent of all scenic design positions. Scenic designers with an average of three to less than five positions per season (at least 21 but less than 35 designs over the 7 seasons) were 4.8 percent of all scenic designers, and they held 19.7 percent of all scenic design positions. Scenic designers with an average of five to less than eight positions per season (at least 35 but less than 56 designs over the 7 seasons) were 3.0 percent of all scenic designers, and they held 19.8 percent of all scenic design positions. Scenic designers with an average of eight to less than nine positions per season (at least 56 but less than 63 designs over the 7 seasons) were 0.2 percent of all scenic designers, and they held 1.7 percent of all scenic design positions.
