

## Ranges of All Designers by Positions Per Season in Relation to Total Number of Designers and Design Positions

The following statistics are based on number of positions per designer over all seven seasons examined.

In all design, designers with an average of less than one position per season (less than 7 designs over the 7 seasons) were 72.8 percent of all designers, and they held 24.4 percent of all design positions. Designers with an average of one to less than three positions per season (at least 7 but less than 21 designs over the 7 seasons) were 20.0 percent of all designers, and they held 37.9 percent of all design positions. Designers with an average of three to less than five positions per season (at least 21 but less than 35 designs over the 7 seasons) were 5.0 percent of all designers, and they held 21.5 percent of all design positions. Designers with an average of five to less than eight positions per season (at least 35 but less than 56 designs over the 7 seasons) were 1.9 percent of all designers, and they held 13.6 percent of all design positions. Designers with an average of eight to less than eleven positions per season (at least 56 but less than 77 designs over the 7 seasons) were 0.2 percent of all designers, and they held 2.6 percent of all design positions.
